When first getting started in musical freestyle, many feel over-whelmed by the process of creating a routine. After all, we are trainers! Not dancers! The cool thing is you don't have to know how to dance to do freestyle. This workshop will break down the components of choreography giving you an overview and better understanding of how to create a freestyle routine, starting with music selection and finding your inspiration, to putting behaviors into sequences that create flow, right down to your ending pose. Come learn about one of the most challenging and fun sports out there!
